DOCKSENSE™ CONTROL - ASSISTED DOCKING TECHNOLOGY

DockSense is available as part of DockSense Control and DockSense Alert systems. DockSense Alert provides enhanced situational awareness to captains. DockSense Control builds on this with a vessels engine and control systems as detailed below. Yachtsense systems are available through boat builders and technical dealers only.

THE DOCKING CHALLENGE

Docking a boat can be a stressful experience, even for the most experienced captains. Often wind and tides make the task more difficult, and docking mishaps can become expensive repairs. The Raymarine DockSense™ Control system is designed to augment a captain's boat handling skills using the system's Virtual Bumper™ zone technology around the vessel. Should an object like a piling or another vessel encounter the Virtual Bumper, DockSense™ Control automatically introduces corrective steering and throttle commands to avoid the object and assist the captain in guiding the vessel to the dock.

THE FUTURE OF BOAT HANDLING

DockSense™ Control uses global positioning system (GPS) and attitude heading reference system (AHRS) position sensing technology to compensate for the effects of wind and currents, ensuring the vessel enters the dock without drama or costly collisions. The Raymarine DockSense™ Control systems include multiple FLIR machine vision cameras, a central processing module, and the DockSense™ Control App running on Raymarine's Axiom navigation display. The system integrates with modern joystick propulsion systems, providing assisted steering and throttle commands to help captains make a smooth arrival.

DOCKSENSE

ASSISTED DOCKING TECHNOLOGY

DOCKSENSE™ ALERT

DockSense Alert is the next generation of Raymarine's intelligent docking technology designed to enhance a captain's awareness of immediate surroundings while manoeuvring the vessel in close quarters. Using advanced stereo vision camera technology, DockSense Alert detects objects above the water line and creates an intuitive map of potential hazards around the boat. Live video feeds enhance the captain's view while audible and visible alerts inform the captain when an object is close to the vessel.

DOCK WITH CONFIDENCE

DockSense Alert gives captains the confidence to dock in challenging conditions at any dock, in any location. Unlike other docking assistants, DockSense Alert does not require any complex external dockside beacons or sensors. Raymarine's DockSense Alert is entirely self-contained and integrated with the vessel's navigation system and ready to use in every docking location.

At the helm, Axiom's DockSense Alert app provides an informative map showing distance to objects around the boat. Live camera feeds provide added confidence by eliminating blind spots and allowing the captain to see what is happening in real-time. DockSense Alert also offers helpful notifications tuned to the captain's preferred proximity alert distance.

DOCKSENSE ALERT VESSEL INTEGRATION

DockSense Alert systems are designed for professional engineer installation, and each system integrates with Raymarine Axiom multifunction navigation displays. In addition to advanced 3D stereo vision cameras, DockSense Alert systems require precision heading and motion-sensing technology in the form of the AR250 and AR270 DockSense heading sensors. The two sensors combine to create a highly accurate GPS compass system, unaffected by magnetic interference. When outfitting a vessel, Raymarine DockSense experts will partner with your engineering team to design a DockSense Alert system that provides maximum coverage and confidence for you.

YACHTSENSE ECOSYSTEM

The new YachtSense Ecosystem enables complete onboard and offboard integration with all devices connected to the boat's network.

An installed system assures captains and boat owners of the readiness of their vessel prior to, during and after their voyage. They are always connected to the boat.

Voyage preparations can begin before leaving home, and whilst onboard guests and crew can be connected to the boat.

NEW

LEVEL 1: MOBILE COMMAND

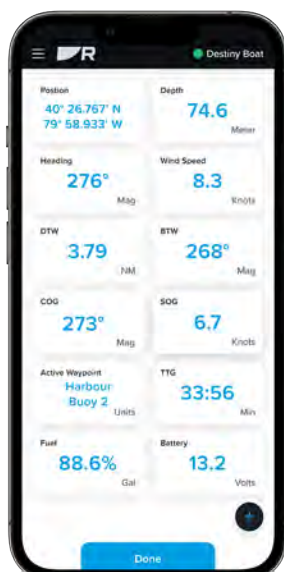

RAYMARINE APP

The Raymarine® App can operate independently of YachtSense Link and YachtSense. The app connects directly to Axiom® displays via Wi-Fi.

- Stream and control Axiom multifunction displays from anywhere onboard
- Back-up waypoints, tracks and screenshots on your mobile device

RAYMARINE APP WITH YACHTSENSE LINK

- Remotely access and control YachtSense connected devices
- Monitor your boat remotely with GeoFence and YachtSense Link
- View real time instrument and navigation data

YACHTSENSE ECOSYSTEM

NEW

LEVEL 2: OFFBOAT CONNECTIVITY

YACHTSENSE LINK

YachtSense Link is a multi-purpose marine mobile router equipped with Raynet Ethernet ports, mobile broadband connectivity, and onboard Wi-Fi. YachtSense Link allows crew and family to connect Axiom® displays, phones, tablets, and PCs to a unified onboard network. YachtSense Link automatically switches between marina Wi-Fi and mobile networks to ensure you are always connected. Combine YachtSense Link with the Raymarine mobile app for remote access to your Raymarine network and enjoy the added security of remote GeoFence vessel monitoring. YachtSense Link also features low-voltage digital switching/monitoring channels for controlling and monitoring onboard electrical devices like pumps, batteries, lighting, and more.

- Mobile broadband connection to 4G (LTE) networks (SIM card and data plan required)
- Supports dual SIM cards for seamless connectivity to international mobile networks
- 4 Raynet Ethernet ports for connecting Raymarine devices
- Integrated GPS with a range extending 4 in 1 antenna (GPS/ GNSS, 3G, 4G, and Wi-Fi)
- Low power consumption mode supports GeoFence remote monitoring (subscription required)
- SeaTalkNG/NMEA2000 port
- 4 x input and output low voltage digital switching channels
- Easy DIY setup using a web browser or Axiom display
- Rugged IPX6 enclosure is shock and vibration resistant

LEVEL 3: SMART HOME ON THE WATER

YACHTSENSE

YachtSense is Raymarine’s bespoke digital control system that controls and monitors all of a vessel’s electrical and electronics systems. When integrated with the Raymarine app and YachtSense Link, the YachtSense Digital Control System can be remotely accessed and controlled from anywhere there is internet access. Operate onboard equipment, monitor vessel systems, and respond to notifications right from the Raymarine app on your mobile phone or tablet.

YACHTSENSE ECOSYSTEM

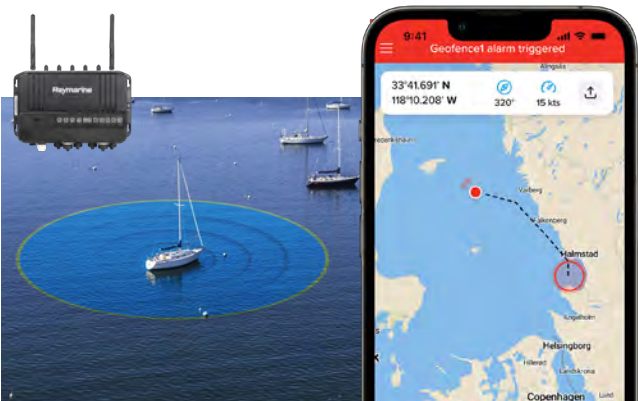

LEVEL 1: COMMAND AND CONTROL

Stream and control Axiom from your phone or tablet from anywhere onboard.

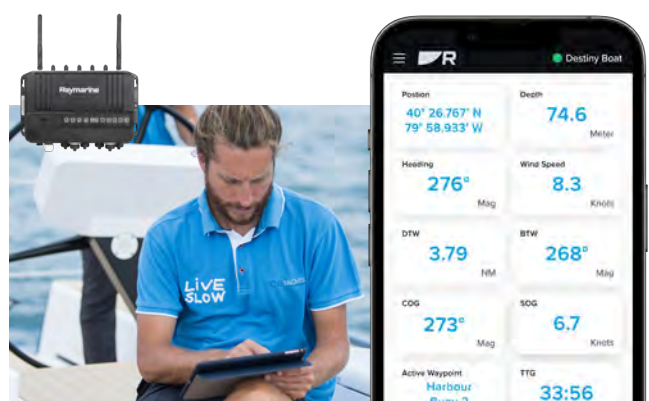

LEVEL 1: SECURE BACK UP

Critical waypoints, routes and tracks can be transferred to your mobile device.

LEVEL 2: REMOTE MONITORING

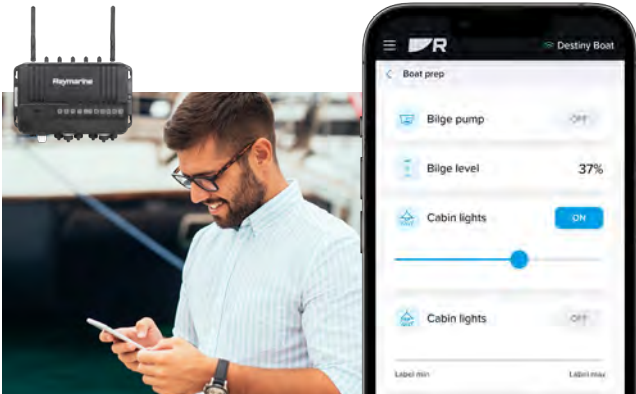

Raymarine GeoFence provides alerts and notifications if your vessel moves in or outside a safety zone.

LEVEL 2: STAY INFORMED

Connect and view real time instrument and navigation data on board or remotely.

YACHTSENSE ECOSYSTEM

LEVEL 2: REMOTE MONITORING

Monitor bilge water sensors, battery voltage, shore power, smoke alarms and more. Control is afforded with the addition of a switching relay.

LEVEL 2: ALWAYS CONNECTED

Connect Raymarine equipment, tablets, smart TVs, and other wireless devices to a unified onboard Wi-Fi network with 4G mobile broadband.

LEVEL 3: TOTAL COMMAND OF THE VESSELS ELECTRICAL SYSTEMS

YACHTSENSE

YachtSense Digital Control System

YachtSense™ is the future of vessel automation. An advanced digital control system, YachtSense gives the captain total command and complete awareness of a vessel's electrical systems. YachtSense offers the most scalable, configurable, and fail-safe marine automation system available. The system offers intuitive control of every device, from lighting, pumps, and sunshades to wipers, windlass, and bathing platforms.

SCALABLE

Unique modular system architecture gives boat builders the freedom to design and standardize on a digital control solution that can scale across an entire model range.

ENGINEERED FOR THE UNEXPECTED

Three layers of redundancy give captains peace of mind. An integrated keypad allows for manual override while the LCD provides system diagnostics. Rugged IPX6 enclosures and backed by 3-year warranty.

YACHTSENSE

MODERN VESSEL AUTOMATION

YachtSense™ bespoke Axiom user interface options empowers boat builders to create a modern and elegant vessel automation solution. YachtSense gives captains total control from the helm or their mobile device.
