

Echo Sounders & Fish Finders

High accuracy and fast data processing,
ideal for commercial fleets.

Echo sounder JFC-800/810

The JFC-800/810 all-in-one echo sounder utilizes a rugged 10.4-inch bonded and sunlight viewable display, offering advanced filtering capabilities using digital signal processing technology to ultimately provide a clear image and allow for deeper sounding at higher frequencies.

Echo sounder JFC-180BB

The JFC-180 is an innovative, blackbox echo sounder which is capable of displaying 4 different frequencies at the same time, providing the operator greatly enhanced fish detection. It is easier to differentiate between the various fish species, large shoals of fish and the seabed, resulting in better targeted catches and contributing to conservation of fish stocks.

Echo Sounder JFC-130 (1kW)/130HP (3kW)

The JFC-130/130HP Fish Finder is designed with three components that are a 10.4-inch high visible TFT colour LCD display, processor and dedicated keyboard. This will show sharper pictures of fish schools, plankton and seabed conditions. Straightforward menus and operation for ease of use.

Echo sounder JFC-7050

The JFC-7050 echo sounder/fish finder incorporates a bright 7-inch display and simple operation, allowing for flexibility and highly accurate and reliable read-out functionality. Displays echoes on both 50 and 200kHz frequency. Generally the lower frequency is more suitable for bottom discrimination, while the high frequency is more useful for shallow water detection.
