SAILING

CRUISING

FISHING

AIS (Automatic Identification System) systems enable the wireless exchange of navigation status between vessels and shore-side traffic monitoring centres. Commercial ships, ocean-going vessels and recreational boats equipped with AIS transceivers broadcast AIS messages that include the vessel's name, course, speed and current navigation status.

## AIS700 AIS TRANSCEIVER

The AIS 700 is a Class B Transceiver featuring the latest SO-TDMA Technology. Complete with an internal antenna splitter that allows the AIS to share the antenna with the VHF.

## AIS4000 AIS TRANSCEIVER

The AIS4000 boasts a high definition colour display for quick access to integrated charts, alarms, and tracking. Additional support for wired and wireless networking with shipboard systems make AIS4000 a premier SOLAS and Inland Waterway-certified Class A transceiver.
